African Organic Chemistry Tournament

(2nd Edition)

Eligibility: SSS 1- 3

Exam Mode: CBT

STAR PRIZE: ~~₦~~500,000 Cash Prize & Plaque

OVERALL BEST SCHOOL:
- Chemistry Laboratory Set

OVERALL BEST TEACHER:
- A Laptop & Plaque

TOP 50 OVERALL BEST CANDIDATES
- Medal
- Certificate of Excellence
- CHEM-50 Hall of Fame Membership

Reg. Fee:

Individual: **N7000**

Group of 10 and above **N5000** per candidate.

Registration Procedure:

Pay to 1025357212//UBA//Prime STEM Nigeria and send the evidence via Whatsapp to +2348105541242 to proceed with your registration.

Preparatory Handbook: https://selar.com/855695835a

Exam Date: **Sat. Nov. 14 - Sat. Nov. 21, 2026**

For enquiries & sponsorship, contact Customer Care: **08121281203**

A Word From Us

Dear school owners, principals, teachers, parents and candidates,
We wrote this handbook so that you never have to chase information through flyers and forwarded messages. In these pages we explain why we created the 2nd Edition of the African Organic Chemistry Tournament (AOCT), who may enter, how to register, what you can win and how to prepare well. If you are coordinating a school group, please read it from start to finish. If you are a candidate or a parent, the preparation sections are where we would like you to spend most of your time.

To school owners and principals: We invite you to see AOCT as an investment in your school's science culture. Please appoint one dependable coordinator and back that person with your authority. The rest of this handbook shows them exactly what to do.

To teachers: You are the reason a student falls in love with chemistry. We built this competition to give your best students a bigger stage, and to show you where your class is strong and where it needs more work.

To parents: We ask for your encouragement and your support at home: a quiet place to study, a charged device and a steady connection on exam day. Please pay only into the account we list in this handbook, and never into any other account.

To candidates: This is your chance to show what you can do. Understand the concepts instead of memorising answers, practise under time, and treat every mistake as a free lesson. Winning is wonderful, but our real hope is that every one of you leaves a stronger chemist.

Please rely on our latest written instructions
This is what we have published so far: SSS 1–3 candidates, an examination window of 14–21 November 2026, an entry fee of ₦7,000 per candidate (₦5,000 each for groups of 10 or more) and a ₦500,000 star prize. Some of our public programme pages describe the exam mode and schedule differently, so we ask every registered school to rely on the written instructions we send you for the exact CBT date and time, how to access the exam, permitted resources and any final change to the schedule.

Start here: get the AOCT registration material for ₦2,300
We prepared the AOCT master preparatory handbook so that every school and candidate can begin with confidence. Download your copy today for ₦2,300: https://selar.com/855695835a

1. About the African Organic Chemistry Tournament

The African Organic Chemistry Tournament (AOCT) is an interschool organic chemistry competition that we, at Prime STEM Nigeria, organise for senior secondary school students. We ask candidates to apply what they understand about organic chemistry, to analyse chemical information and to solve problems with sound scientific reasoning.

Our aim is simple. We want to promote excellence in organic chemistry, find and celebrate talented chemistry students, sharpen their analytical and problem-solving skills, and spark an interest in chemistry-related university programmes and careers.

What we hope to achieve

- To deepen students' understanding of organic chemistry and show them how it applies in the real world.
- To build analytical thinking, accuracy and structured problem-solving.
- To encourage healthy academic competition among schools and students across Africa.
- To recognise outstanding candidates, schools and chemistry teachers.
- To inspire young people to consider careers in chemistry, medicine, pharmacy, chemical engineering, biochemistry, materials science and related fields.

How AOCT can help your school

We believe that taking part can strengthen your school's chemistry enrichment programme, push students to study beyond routine classroom exercises, give you a benchmark that shows your strengths and gaps, and offer a positive stage on which to celebrate academic achievement.

2. Who Can Participate?

Eligibility item	Our guidance
Target class levels	We welcome Senior Secondary School 1, 2 and 3 (SSS 1–3) students.
Countries	We run AOCT as a Pan-African programme. If your candidates are outside Nigeria, please contact us so that we can confirm the arrangements for your country.
Entry route	We encourage school-based registration. Please follow the instructions on our official portal for school cohorts or individual entries.
Subject background	Your candidates should be studying Chemistry, and should prepare specifically for organic chemistry concepts.

Before you submit any registration, please confirm that each learner is eligible. Enter every candidate under the correct class, and make sure names are spelled exactly as they appear in your school records.

A request to school administrators
Please appoint a school coordinator, such as the principal, a chemistry teacher, the examination officer or the science coordinator, to oversee candidate selection, registration, payment records and communication with our team.

3. What Is Organic Chemistry?

Organic chemistry is the branch of chemistry that studies carbon-containing compounds: their structures, properties, reactions, preparation and uses. It explains the substances in the fuels we burn, the medicines we take, and the plastics, cosmetics, food components, textiles and living systems all around us.

Why we think it matters

- Medicines and healthcare: it helps us understand how many pharmaceutical compounds are built and how they react.
- Energy: it is the study behind hydrocarbons and fuels.
- Materials: it explains polymers, plastics, fibres, adhesives and coatings.
- Agriculture and food: it helps us understand the organic molecules in fertilisers, pesticides, flavours and nutrients.
- Industry and innovation: it guides the design of useful products and better chemical processes.

The skills we want you to build

Skill	What it means for you
Structural reasoning	Reading molecular and structural formulae and spotting functional groups.
Pattern recognition	Using trends in properties and reactivity to compare compounds.
Reaction analysis	Identifying reactants, products, conditions and reaction types.
Evidence-based problem-solving	Using the data you are given, together with chemical principles, to justify your answer.
Accuracy	Double-checking formulae, names, charges, units and, where relevant, stereochemical details.

4. Competition Format and Examination Window

Item	Our current programme information
Edition	2nd Edition
Examination window	14–21 November 2026
Target candidates	SSS 1–3 Chemistry students
Competition type	Organic chemistry academic tournament / interschool olympiad
Mode	We are running this edition as a computer-based test (CBT). We will confirm the online access procedure and each candidate's assigned sitting with registered schools. Candidates can participate using their phones where computers are nit available. However, no matter the device you choose to use, you will be strictly monitored by the application and our team.
Stages described	There are two stages – preliminary stage and final stage. Each stage comes with 50 objectives questions. The top 100 candidates in the preliminary round shall proceed to the final round.

Some of our public programme pages present the schedule differently, so please do not assume that every candidate may write at any time within the whole window. You are required to choose your exam time and date during your registration.

A timeline we recommend for your school

Stage	What we recommend
Immediately	Appoint a coordinator, identify eligible candidates and confirm our current registration instructions.
At registration	Submit accurate candidate information and keep a copy of the list you submitted with the exam time and date chosen.
During preparation	Run structured lessons, timed practice and correction sessions.
Before the exam window	Confirm the assigned date and time, platform access, and device and internet requirements.
24–48 hours before the sitting	Test the device and the connection, go over the rules, and make sure the candidate knows how to reach technical support.

After the exam	Follow our official instructions and wait for verified result announcements.

5. How to Register Your School

Registering through your school lets us coordinate candidate details and group entries properly. We ask every school to name one responsible person to manage the process and keep the school leadership informed.

1. Get your copy of the AOCT master preparatory handbook for ₦2,300 at https://selar.com/855695835a. It will walk you and your candidates through what to expect.
2. Prepare each candidate's full name, class level, school details and the contact information the form asks for.
3. Check spelling and class or category carefully before you submit.
4. Confirm the applicable fee and payment details directly on our official website or with us.
5. Pay through the official channel we have confirmed, and send a copy of your transaction receipt to us through our email or WhatsApp contact for confirmation and issuance code and e-registration form.
6. Ask us to confirm that your school and candidates have been recorded, and keep every confirmation message.

6. Entry Fees and Payment

Registration type	Fee we have published
Individual candidate	₦7,000 per candidate
Group registration of 10 or more	₦5,000 per candidate
Registration material (digital download)	₦2,300 per copy: https://selar.com/855695835a

These are the published AOCT 2nd Edition entry rates. Please confirm the amount that applies to your school before you pay, particularly if we announce a promotion or deadline.

Payment information	Details we have published
Bank	United Bank for Africa (UBA)
Account name	PRIME STEM NIGERIA
Account number	1025357212
Proof of payment	Send your receipt and candidate list to primestemnigeria@gmail.com, or to the official WhatsApp contact +2348105541242

Payment safety
Please verify the account details and the amount on the official AOCT page, or with us, before you transfer any money. Keep your transaction receipt and registration code(s)

7. What You Can Win

Award	What we have published
Star Prize / Overall Champion	₦500,000 cash prize and plaque
Overall Best School	Chemistry laboratory set
Overall Best Teacher	Laptop and plaque
Top 50 overall best candidates	Medal, Certificate of Excellence and CHEM-50 Hall of Fame membership. There will be consolation prizes to the top scorers among the 50, subject to our policy.
Other participants	Certificates of participation and achievement, subject to our award policy

Our official results and award rules decide the final rankings and eligibility. We ask schools not to announce any candidate as a winner until we have published or confirmed the result. Any travel, university linkage, study grant or other opportunity is subject to separate official confirmation from us.

What recognition can mean to you

- A public celebration of your students' chemistry knowledge and effort.
- A positive way for your school to showcase academic enrichment.
- A source of motivation for candidates who are considering chemistry-related careers.
- A chance to honour the teachers who mentor students and build a strong science culture.

8. Why Your School Should Join Us

- It encourages students to study chemistry with greater depth and purpose.
- It supports your school's science enrichment and academic excellence goals.
- It gives students a structured challenge beyond routine classroom tests.
- It helps teachers see which topics need more explanation or practice.
- It offers candidates a platform to show analytical thinking and persistence.
- It brings school-level recognition and a chance to celebrate chemistry teaching.
- It connects your school with a wider community of chemistry learners and educators.

We ask you to present AOCT to your students as a learning and development opportunity. Prizes are competitive and we cannot guarantee them, so please encourage every candidate for honest effort and improvement.

9. How to Prepare as a Candidate

Good preparation combines understanding the concepts, solving problems again and again, and reviewing your mistakes with care. Please do not rely on memorising answers alone. Make sure you understand why a particular answer or reaction pathway is correct.

Preparation phase	Focus	Suggested practice
1. Diagnose	Find your strong and weak topics.	Attempt a short mixed-topic quiz and classify each error.
2. Build concepts	Review structures, naming, functional groups and reaction principles.	Make summary sheets; draw structures from names and write names from structures.
3. Apply knowledge	Practise reactions, isomerism, properties and calculations.	Write reagents and conditions where relevant, and predict the products.
4. Work under time	Improve your speed without losing accuracy.	Complete timed sets of multiple-choice and structured questions.
5. Correct and consolidate	Understand the mistakes you keep making.	Keep an error log and redo missed questions after a few days.

A weekly study routine we suggest

Day	Suggested focus
Monday	Structure, bonding, molecular formulae and functional groups
Tuesday	IUPAC nomenclature and isomerism
Wednesday	Physical properties and trends across homologous series
Thursday	Reaction types, mechanisms and product prediction
Friday	Mixed timed questions and error correction
Saturday	Past-question practice and discussion with a teacher
Sunday	Light review, flashcards and rest

Teachers, please adapt this plan to the official scope, your candidates' class levels and the time you have. Use our registration material and past questions alongside it, and check our official page for the current resource link.

Your study companion: the AOCT registration material, ₦2,300
Every candidate preparing for AOCT should have a copy. It is our preparatory handbook, and it is the quickest way to know what to expect before you register and revise. Download it here: https://selar.com/855695835a

10. Organic Chemistry Topics to Revise

Here is a broad revision checklist for senior secondary organic chemistry. Please treat it as a preparation guide and not as a guaranteed official syllabus: the official areas of concentration that we supply take precedence.

Topic area	Key ideas to review
Introduction and bonding	Carbon's tetravalency, covalent bonding, structural and molecular formulae, and the different ways organic molecules are represented.
Classification and homologous series	Alkanes, alkenes, alkynes and the common functional-group families, with their general formulae and characteristic reactions.
Nomenclature	Choosing the parent chain, numbering, substituents, prefixes and suffixes, and naming simple branched compounds.
Isomerism	Structural isomerism and, where your syllabus covers it, geometric and optical stereoisomerism.
Hydrocarbons	Preparation, properties, combustion, substitution, addition and uses of alkanes, alkenes and alkynes.
Aromatic compounds	The structure of benzene, aromaticity at an introductory level, substitution reactions and common derivatives.
Haloalkanes	The C–X bond, plus substitution and elimination at the level your syllabus requires.
Alcohols and phenols	Functional groups, classification, oxidation, dehydration, comparisons of acidity and uses.
Aldehydes and ketones	The carbonyl group, naming, oxidation and reduction patterns, and characteristic reactions.
Carboxylic acids and esters	Acidic properties, esterification, hydrolysis, naming and applications.
Amines and amides	Nitrogen-containing functional groups, basicity at an introductory level, naming and uses.
Polymers	Addition and condensation polymerisation, monomers, polymer properties and environmental concerns.
Organic analysis	Interpreting simple chemical tests, observations and deductions, where these are part of the official scope.
Reaction pathways	Recognising reactants, products, reagents, conditions and the likely reaction type.

Study smart
Put our official AOCT areas of concentration first whenever we supply them. If a topic on this general list lies beyond the announced scope, please do not let it crowd out the revision of confirmed topics.

11. Getting Ready for the Online CBT

Before the examination

- Confirm the candidate's assigned examination date, start time, duration and platform instructions.
- Use a compatible device and test it in advance. Make sure the battery is charged and that power is available.

- Check the internet connection and, if possible, line up a reliable backup.
- Choose a quiet, well-lit place and keep interruptions to a minimum.
- Keep the candidate's registration details and the authorised support contact close at hand.
- Read our official rules on calculators, notes, browsers, phones, outside help and permitted materials.

During the CBT

- Log in or connect only as we instruct, and allow time for any identity or registration checks.
- Read each question carefully and manage your time across the paper.
- Use only permitted resources. Please do not consult unauthorised websites, notes or other people.
- Do not share screenshots, questions or answers unless we explicitly permit it.
- If a technical problem occurs, follow the official procedure and report it promptly to the designated support contact.
- Submit the examination as instructed, and confirm that the platform shows a successful submission, if it gives such a message.

After the examination

- Follow our guidance on leaving the platform and on keeping examination details confidential.
- Do not publish unverified scores, and do not circulate supposed answers as official.
- Keep your registration confirmation, and report any unresolved technical issue through the official channel.

12. A Note to School Coordinators

Area	What we count on you to do
Eligibility	Verify that candidates are in SSS 1–3 and are entered correctly.
Registration	Submit accurate information and keep a copy of the candidate list.
Fees	Confirm the group size, the applicable rate, the payment receipt and the registration status.
Communication	Share our official notices with school leadership, chemistry teachers, candidates and parents or guardians.
Preparation	Coordinate a realistic revision plan and direct candidates to approved materials, starting with the registration material.
Technology	Help candidates test their devices, internet access and examination instructions without compromising the integrity of the exam.
Safeguarding and privacy	Handle candidate details responsibly and share only what is necessary, through official channels.
Results	Wait for our official results, and follow our process for award verification or queries.

13. Questions We Are Often Asked

What is AOCT?

AOCT is the African Organic Chemistry Tournament, an interschool organic chemistry competition that we organise at Prime STEM Nigeria to challenge students and celebrate achievement in chemistry.

Which edition does this handbook cover?

The 2nd Edition.

Who can participate?

Senior Secondary School students in SSS 1, 2 and 3, subject to our official eligibility rules.

Can schools outside Nigeria take part?

AOCT is a Pan-African programme. Schools outside Nigeria should contact us so that we can confirm the registration, payment and examination arrangements for their country.

When is the examination?

Our currently published window is 14–21 November 2026. Please confirm each candidate's exact sitting date and time in the latest official instructions we send you.

Is AOCT online?

For this edition, we are running a CBT, and we will confirm the online participation instructions. Please follow the written instructions issued to registered candidates.

How much is registration?

₦7,000 per candidate, or ₦5,000 each for group registration of 10 or more, according to the current programme page. Please confirm before you pay.

How do we register a school group?

Use the official AOCT programme page, submit accurate candidate details, pay the confirmed fee and send your payment evidence through the official channel.

What are the main prizes?

Our published awards include ₦500,000 and a plaque for the star prize, a chemistry laboratory set for the Overall Best School, a laptop and plaque for the Overall Best Teacher, consolation prizes to some top candidates and recognition for the Top 50 candidates.

What should students study?

Follow our official areas of concentration. For general preparation, work on nomenclature, functional groups, isomerism, hydrocarbons, organic reactions, carbonyl compounds, carboxylic acids, esters and polymers, as applicable to the official scope.

Where can we get the registration material?

The AOCT registration material, our preparatory handbook, costs ₦2,300. Download it here: https://selar.com/855695835a

When will results be released?

Please follow official announcements from Prime STEM Nigeria, and do not rely on unofficial dates.

Who can answer registration questions?

Email us at primestemnigeria@gmail.com or call +234 810 554 1242 / +234 813 825 8491.

14. Reach Us and Useful Links

Resource	Details
AOCT programme page	https://primestemnigeria.afristemglobal.org/programs/african-organic-chemistry-tournament
Registration material	https://selar.com/855695835a
Email	primestemnigeria@gmail.com
Phone / WhatsApp enquiries	+234 810 554 1242 | +234 813 825 8491
Website	https://primestemnigeria.afristemglobal.org

When you contact us, please include your school name, the candidates' class, the number of candidates and the question you need answered. Never send passwords or unnecessary sensitive information.

15. Your School Registration Checklist

- ☐ We have appointed a school coordinator.
- ☐ We have checked every candidate for SSS 1–3 eligibility.
- ☐ We have confirmed the current fee and the group discount conditions.
- ☐ We have downloaded the AOCT registration material from https://selar.com/855695835a.
- ☐ We have checked each candidate's details for accuracy.
- ☐ We have submitted the official registration form.
- ☐ We have kept our payment evidence and sent it through an official channel.
- ☐ We have asked for confirmation of our registration.
- ☐ Our candidates have received the official topic outline or areas of concentration.
- ☐ We have organised a practical revision timetable.
- ☐ We have confirmed the exact CBT date and time, the platform access and the permitted materials.
- ☐ We have tested devices, power and internet access.
- ☐ Our candidates understand the examination rules and academic integrity expectations.
- ☐ We will wait for official results before announcing winners.

A Final Word From Us

We created the African Organic Chemistry Tournament to give schools a reason to make chemistry learning purposeful, to recognise what young people can do, and to encourage the next generation of African scientists. Register early, prepare with focus, keep communication open and compete honestly, and you will gain the most from this experience. We look forward to welcoming your school and your candidates.

Take the next step today
Download the AOCT registration material for ~~₦~~2,300: https://selar.com/855695835a
Then register your school on our official portal, and email or call us with any question.

With warm regards,
The Organisers, PRIME STEM NIGERIA

Think Chemistry. Master Organic Chemistry.
