STEM KIDS CHAMPIONSHIP

(5TH EDITION)

S Science T Technology E Engineering M Mathematics

Onsite & CBT

Eligibility:
Grade 3&4 // Grade 5&6 // JSS 1-3

PRIZES & RECOGNITION

OVERALL CHAMPION:
~~₦~~1,000,000
CASH PRIZE & Plaque

BEST PARTICIPATING SCHOOL:
Full STEM
(Robotics) Kit

BEST PERFORMING SCHOOL:
Full STEM
(Robotics) Kit

BEST CANDIDATE IN EACH CATEGORY:
THREE-YEAR EDUCATIONAL SCHOLARSHIP

OVERALL BEST TEACHER:
~~₦~~200,000
CASH PRIZE & Plaque

TOP 100 OVERALL BEST CANDIDATES:
- Medal • Certificate of Excellence
- STEM-100 Hall of Fame Membership

Reg. Fee:
Individual:
~~₦~~4000
Group of 10 and above
~~₦~~3000

A Word From Us

Dear school owners, school administrators, teachers, parents and candidates,
We prepared this handbook to put everything you need to know about the 5th Edition of the STEM Kids Championship (SKC) in one place: who can enter, how to register, how to choose your exam mode and location, what you can win and how to prepare. It is a guide for you, and it does not replace the official instructions we send to registered schools and candidates.

To school owners and administrators: SKC is a chance to put your school's STEM culture on display. Please name one coordinator, register your learners before the deadline on 12 November 2026, and count on us for support from there.

To teachers: You know these children best. Use this championship to discover which topics need another look, and to give your sharpest learners something worth aiming for.

To parents: Your encouragement matters more than any prize. Help your child to keep a calm study routine, get enough rest and eat well on exam day. Please pay only into the account we list in this handbook.

To candidates: Welcome! SKC is about curiosity, not fear. Read every question carefully, do not give up on the hard ones, and remember that every learner who prepares honestly is already a winner in our eyes.

Please watch for updates from us
We may update dates, venue allocations, exam time, delivery arrangements and administrative instructions, so please confirm these details with us before you make travel or payment decisions. At the time of writing, the exam holds on Saturday, 14 November 2026, registration closes on 12 November 2026, and registration costs ₦4,000 for an individual or ₦3,000 per candidate for 10 or more candidates.

Start here: get the Master Preparatory Guide for ₦2,000
We prepared the STEM Kids Championship Master Preparatory Guide so that every learner can start preparing with confidence. It contains past questions and answers from 2022–2025, syllabus guidance and preparation strategies. Download your copy today: https://selar.com/k484f98wdl

1. About the STEM Kids Championship

The STEM Kids Championship (SKC) is an academic competition that we at Prime STEM Nigeria organise to encourage curiosity, critical thinking and achievement in Science, Technology, Engineering and Mathematics. Through the Pan-African Edition, we want young learners to show what they know, build confidence and earn recognition beyond the classroom.

We focus on foundational STEM learning, especially Mathematics, Basic Science and Computer Technology. Our aim is to identify promising learners, encourage healthy academic competition, motivate teachers and schools, and help children see STEM as a pathway to solving real-life problems.

What STEM means to us

Letter	Meaning	What learners practise
S	Science	Observation, evidence, explanations and scientific reasoning
T	Technology	Digital literacy, computer concepts and the appropriate use of technology
E	Engineering	Design thinking, structures, systems and practical problem-solving
M	Mathematics	Numeracy, patterns, measurement, logic and quantitative reasoning

For us, the championship is more than a test. It gives your school a structured way to discover its strengths, encourage STEM clubs and make classroom learning more purposeful.

2. Who Can Participate?

We designed the 5th Edition for learners in upper primary and junior secondary school.

Competition group	Eligible school levels	Typical focus
Primary Group 1	Basic 3–4	Foundational numeracy, science awareness and age-appropriate computer knowledge
Primary Group 2	Basic 5–6	More developed problem-solving, basic scientific concepts and digital literacy
Junior Secondary	JSS 1–3	Junior-secondary Mathematics, Basic Science and Computer Technology

Please enter each candidate under the correct class or category on the registration form. If a learner's class placement is unusual, ask us to confirm the right entry before you submit.

- Public and private schools are both welcome.
- We encourage schools to register a group of learners and to appoint a teacher or coordinator to handle communication with us.
- For the Pan-African Edition, schools outside Nigeria should confirm their country-specific registration, exam mode and payment instructions with us.

3. Subjects and Competition Categories

We have published three subject areas:

Subject	What to revise
Mathematics	Number operations, fractions, decimals, percentages, ratio, measurement, geometry, patterns, word problems and logical reasoning suited to the candidate's class.
Basic Science	Living and non-living things, the human body, plants and animals, matter, energy, forces, the environment, health, simple machines and scientific investigation.
Computer Technology	Computer parts and functions, input and output devices, storage, basic software concepts, digital safety, responsible use of technology and introductory computing concepts.

Important
Please treat this list as a preparation guide and not as an exhaustive official syllabus. Wherever we supply official areas of concentration and instructions for the 5th Edition, follow those first.

4. Date, Exam Mode and Location

Item	Current information
Examination date	Saturday, 14 November 2026
Registration deadline	12 November 2026
Target groups	Basic 3–6 and JSS 1–3
Coverage	Nigeria and selected African cities
Exam mode	Physical or online. You choose your exam mode and location when you register.
Exam time	We will confirm the official start time and reporting time to your coordinator.

We know that not every family lives near an exam venue. If the physical location in your state or city is too far away, your candidates may write online instead. Either way, you must choose your exam mode and location during registration, so please decide before you register and make sure every candidate on your list is placed correctly.

Because arrangements differ by location, please do not assume that every candidate will use the same venue or method. Ask us for written confirmation of the approved centre or online access details, the reporting time, the candidate list and any permitted materials.

A timeline we suggest for your school

When	What we recommend
As soon as possible	Appoint a coordinator, choose your candidates, decide each candidate's exam mode and location, and confirm the current fees.
During preparation	Use a weekly study plan, short practice tests and feedback sessions.
Before 12 November	Complete your registration, pay, send us your evidence of payment, and collect your candidate codes and e-registration forms.
After registering	Check that every candidate's name, class, school and contact details are correct. Confirm the venue or online access, time, candidate numbers and required materials.
The day before	Remind candidates about rest, punctuality, conduct and what to bring.
Exam day	Arrive or connect according to our instructions and follow the invigilators' directions.

5. How to Register

We encourage schools to coordinate registration centrally. It reduces errors, makes payments easier to track and lets us deal with one responsible contact.

Registration closes on 12 November 2026
Please do not wait until the last day. Complete your registration, payment and proof of payment well before the deadline, so that you receive your candidate codes and e-registration forms in good time for the exam on 14 November.

1. Get the Master Preparatory Guide for ₦2,000 at https://selar.com/k484f98wdl, and start preparing while you register.
2. Select a school coordinator, such as a teacher, an examination officer or an administrator.
3. Prepare a clean candidate list with each learner's full name, class and category, chosen exam mode (physical or online) and location, plus any other details the registration form asks for.
4. Confirm the applicable fee, then pay into our official account, which is listed in the next section.
5. Send your evidence of payment and your candidate list to us through the official email or WhatsApp contact.
6. Receive your candidate code and e-registration form from us, and keep a copy of your submitted list, your payment evidence and every confirmation.
7. Complete the registration details carefully, and avoid nicknames and inconsistent spellings. This is the stage where you choose your exam mode and location.
8. Make sure each candidate has their code and e-registration form, and knows the exam arrangements.

6. Fees and Payment

Here is what registration costs for the 5th Edition. Please confirm the amount that applies to you before you pay.

Registration item	Fee
Individual registration	₦4,000 per candidate
Group registration (10 or more candidates)	₦3,000 per candidate
Master Preparatory Guide (digital download)	₦2,000: https://selar.com/k484f98wdl
Registration deadline	12 November 2026

If you register 10 or more candidates, the ₦3,000 rate applies to each of them. Please make sure your payment matches the number of candidates on your list.

Payment information	Details
Bank	United Bank for Africa (UBA)
Account name	PRIME STEM NIGERIA
Account number	1025357212
After you pay	Send your evidence of payment and candidate list to primestemnigeria@gmail.com, or to the official WhatsApp contact - +2348105541242. We will then send you your candidate code and e-registration form.

Payment safety
Please verify the account details and the amount with us, before you transfer any money. Keep your receipt.

7. Awards, Prizes and Recognition

We recognise high performance by candidates, schools and teachers. This is the prize structure we have announced for the 5th Edition. Please confirm the final award conditions and eligibility with us.

Award / recognition	What we have published
Overall Champion	₦1,000,000 and a plaque
Best Participating School / Best Performing School	Full STEM (Robotics) Kit
Best Candidate in each category	Three-year educational scholarship
Overall Best Teacher	₦200,000 and a plaque
Top 100 candidates	Medal, Certificate of Excellence and STEM-100 Hall of Fame Membership which gives the candidates an opportunity to be mentored and connected to international opportunities.

Awards depend on official results, verification and our published rules. Please do not announce any award as confirmed until we have issued the official result or award notification.

More than prizes

- A positive platform for celebrating learners' effort and academic achievement.
- A chance for your school to strengthen its STEM culture and showcase student talent.
- A motivating experience that can inspire learners to explore science, technology, engineering and mathematics.
- An opportunity for teachers to spot learning gaps and support their students more effectively.

8. How Your School Benefits

- It builds a visible culture of academic ambition and STEM participation.
- It gives learners a goal that encourages revision, curiosity and independent study.
- It helps you identify students who may benefit from enrichment, mentoring or a school STEM club.
- It creates opportunities to recognise the teachers who support learners' growth.
- It lets you use competition preparation to reinforce topics taught in class.
- It strengthens school-community engagement through the responsible celebration of student achievement.
- It helps learners develop confidence, perseverance, time management and problem-solving habits.

We ask you to present SKC to your learners as a learning opportunity and not as a guarantee of winning. Please celebrate effort and improvement as well as top scores.

9. How to Prepare

Steady preparation beats last-minute cramming every time. Teachers, please adapt this plan to each learner's class and to the official areas of concentration.

Week / stage	Study focus	Suggested activity
Stage 1: Diagnose	Review core Mathematics, Basic Science and Computer Technology topics.	Give a short baseline quiz and note the topics that need attention.
Stage 2: Strengthen	Teach or revise weak concepts with examples and demonstrations.	Use class notes, diagrams, simple experiments and worked examples.
Stage 3: Practise	Solve past questions and similar age-appropriate problems.	Set timed practice and discuss why each answer is correct.
Stage 4: Review	Correct mistakes and revisit difficult areas.	Keep a mistake notebook with the correct method or explanation.
Final week	Consolidate key facts, formulas and exam technique.	Use short quizzes, enough rest and a calm revision schedule.

Practical study habits

- Study in short, focused sessions and take brief breaks.
- Explain a concept aloud as if you were teaching it to another learner.
- Practise reading every question carefully before you select an answer.
- In Mathematics, show your working during practice, even if the exam answer format is multiple-choice.
- In Science, understand ideas and applications instead of memorising isolated facts.
- In Computer Technology, connect terms to real devices and safe digital practices.
- Use our official preparatory materials. The Master Preparatory Guide contains past questions and answers from 2022–2025, syllabus guidance and preparation strategies.

A weekly school routine we suggest

Day	Suggested activity
Monday	Mathematics concept review and worked examples
Tuesday	Basic Science revision and short explanations
Wednesday	Computer Technology concepts and digital safety
Thursday	Mixed practice questions and correction of mistakes
Friday	Timed mini-test, feedback and goal setting
Weekend	Optional independent revision and rest. Please do not overload candidates.

Your study companion: the Master Preparatory Guide
Every candidate preparing for SKC should have a copy. It brings together past questions and answers from 2022–2025, syllabus guidance and preparation strategies in one place. Download it here: https://selar.com/k484f98wdl

10. Examination-Day Checklist and Conduct

Before leaving for the venue or logging in

- Confirm your venue or your online access instructions.
- Know your reporting time and the contact person for urgent issues.
- Check the candidate's name, class or category, candidate code and e-registration form.
- Prepare only the materials we have permitted.
- Make sure the learner has eaten properly, rested well and arrives early.
- If you are writing online, follow your coordinator's instructions about device, power, internet connection and permitted applications.

During the examination

- Listen carefully to the invigilator, or read all on-screen instructions.
- Read each question completely before you answer it.
- Manage your time, and do not spend too long on one difficult question.
- Follow the approved rules on calculators, tables, phones and other materials.
- Do not share answers, use unauthorised resources or disturb other candidates.
- Raise any technical or procedural concern with the authorised supervisor immediately.

After the examination

- Follow our instructions on submission, exit procedures and result announcements.
- Do not circulate unverified scores or claim official results before we publish them.
- Keep your registration and communication records until the competition cycle is complete.

11. A Note to School Coordinators

Responsibility	What we count on you to do
Candidate selection	Check eligibility and place every learner in the correct class and category.
Exam mode and location	Make sure each candidate's exam mode and location are chosen correctly at registration.
Registration	Submit complete, accurate details and keep a copy of the final list.
Payment records	Match the number of candidates to the payment you made, and keep your proof of payment.
Communication	Share our official notices with school leadership, teachers, candidates and parents or guardians.
Preparation	Coordinate a realistic revision plan, encourage fair participation and point candidates to the Master Preparatory Guide.
Exam readiness	Confirm the venue or online access, time, format, permitted materials and reporting instructions.
Safeguarding	Provide appropriate adult supervision and protect learners' personal information.
Results and awards	Use only official results, and follow our verification process.

Please collect and share only the personal information that registration requires. Send candidate lists, contact details and payment records through official channels, and handle them responsibly.

12. Questions We Are Often Asked

What is the STEM Kids Championship?

It is a STEM academic competition that we organise at Prime STEM Nigeria to encourage young learners' knowledge, reasoning and interest in Mathematics, Basic Science and Computer Technology.

Which edition is this?

This handbook covers the 5th Edition, the Pan-African Edition.

Who is eligible?

Learners in Basic 3–6 and JSS 1–3. Please confirm the correct category during registration.

Can public and private schools participate?

Yes. The programme is open to eligible learners from public and private schools.

Can schools outside Nigeria participate?

The edition is Pan-African and includes selected African cities. Schools outside Nigeria should contact us for country-specific arrangements.

When is the examination?

Saturday, 14 November 2026. Please confirm your reporting time and your allocated venue or online access with us.

What is the registration deadline?

Registration closes on 12 November 2026. We strongly advise you to register and pay well before that date.

What subjects are covered?

Mathematics, Basic Science and Computer Technology. Please use the official areas of concentration as contained in the preparatory material.

Is the examination online or physical?

Both options are available. You choose your exam mode and location during registration.

What if the physical venue is too far from us?

Candidates in states or cities where the physical location is far away can write online. Just remember to select the online mode when you register.

How much is registration?

₦4,000 for individual registration, and ₦3,000 per candidate for registration involving 10 candidates or more.

How does a school register?

Use our official registration portal, complete the required details (including exam mode and location), and pay into our official account. Then send your evidence of payment and candidate list to us, and we will send you your candidate code and e-registration form.

What prizes are available?

The prizes we have announced include ₦1,000,000 and a plaque for the Overall Champion, a full STEM (Robotics) Kit for the Best Participating or Performing School, scholarships for the best candidate in each category, ₦200,000 and a plaque for the Overall Best Teacher, and recognition for the Top 100. Please confirm the final award conditions with us.

Where can we get preparatory materials?

Our Master Preparatory Guide contains 2022–2025 past questions and answers, syllabus guidance and preparation strategies. It costs ₦2,000. Download it here: https://selar.com/k484f98wdl

When will results be released?

Please follow our official announcements, and do not rely on unofficial dates or unverified score lists.

Who should we contact for clarification?

Email us at primestemnigeria@gmail.com or call +234 810 554 1242 / +234 813 825 8491.

13. Reach Us and Useful Links

When you contact us, please state your school name, candidate category, number of candidates and the specific issue you need clarified. Do not send sensitive information beyond what is necessary.

14. Your Quick Checklist for Schools

- ☐ We have appointed a school coordinator.
- ☐ We have confirmed the eligibility and category of each candidate.
- ☐ We have chosen each candidate's exam mode and location.
- ☐ We have checked the current registration fee and the official payment details.
- ☐ We have submitted the registration form and an accurate candidate list before 12 November.
- ☐ We have sent our evidence of payment to Prime STEM Nigeria and kept copies.
- ☐ We have received our candidate codes and e-registration forms.
- ☐ We have downloaded the Master Preparatory Guide from https://selar.com/k484f98wdl.
- ☐ We have obtained the official areas of concentration or preparation guidance.
- ☐ We have organised a realistic revision timetable.
- ☐ We have confirmed the exam date, reporting time, and venue or online access.
- ☐ Our candidates know the rules and permitted materials.
- ☐ We have shared official contact details and exam-day instructions.
- ☐ We will wait for official results before announcing winners.

A Final Word From Us

We created the STEM Kids Championship so that schools can nurture curiosity, celebrate achievement and help children build the habits of careful thinking and problem-solving. Plan early, register accurately, prepare with purpose and compete fairly, and the experience will be valuable for every candidate. We look forward to welcoming your school and your learners.

Take the next step today
Download the Master Preparatory Guide for ₦2,000: https://selar.com/k484f98wdl
Then register before 12 November 2026, pay into our official account, send us your evidence of payment, and receive your candidate code and e-registration form.

With warm regards,
The Organisers, PRIME STEM NIGERIA

Igniting young minds through STEM.
